PROFILE

Solution-oriented developer combining core system architecture principles from computer science studies with a practical focus on fullstack development. My recent projects focus on designing clean and maintainable systems using **ASP.NET Core**, **C#**, and **React**, with a strict adherence to the *Separation of Concerns* architecture pattern and automated testing. Driven by a deep interest in low-level system design—from compiler technology to hardware diagnostics—my goal is to build software that is as structurally sound as it is scalable.

TECHNICAL PROJECTS

Enterprise Web Application

Backend Development & API Design

📅 Personal Project

- Developed an enterprise-grade web application in **ASP.NET Core**, strictly implementing the *Separation of Concerns* (SoC) architecture pattern.
- Implemented secure authentication and user management routines by customizing ASP.NET Identity.
- Integrated **Serilog** to establish advanced application diagnostics and structured runtime event logging.
- Ensured reliable business logic by writing rigorous unit tests based on the **AAA pattern** (Arrange, Act, Assert).

MyShop E-commerce Platform

Fullstack Architecture

📅 Personal Project

- Designed and developed a complete e-commerce platform from scratch, demonstrating strong independence in fullstack troubleshooting and database normalization.
- Backend:** Designed RESTful services with ASP.NET Core, C#, SQLite, and optimized LINQ queries.
- Frontend:** Built dynamic and responsive interfaces using React, HTML5, and CSHTML.
- Developed robust error handling and continuous application health monitoring using Serilog.

Surfing App (Mobile)

Agile Team Development

📅 Academic Project (Team of 6)

- Collaborated in an agile Scrum team to build a mobile application in **Android Studio** with **Kotlin**, supported by CI/CD pipelines for continuous deployment.

TECHNOLOGY & TOOLS

0.1 Programming Languages

C# Java Kotlin Python C++
Scheme

0.2 Frontend & Frameworks

ASP.NET Core React
HTML5/CSS3 CSHTML

0.3 Databases & Cloud

SQL (MySQL/SQLite) LINQ
RESTful APIs Azure

0.4 Methodologies & Tools

Git/GitHub Android Studio
Agile/Scrum CI/CD Linux
Unit Testing

CERTIFICATIONS

Azure Fundamentals (AZ-900)

Microsoft

📅 2024

Foundational Azure architecture, cloud security, privacy, and infrastructure compliance.

RELEVANT IT EXPERIENCE

Computer Technician

Digital Net

📅 2 Years 📍 Syria

- Performed advanced hardware and software troubleshooting to resolve critical system failures.
- Handled network configuration, system optimization, and direct technical support for end-users in a fast-paced environment.

- Integrated and parsed external **REST APIs** to deliver real-time data to end-users.
- Led the development of the application's core module for user reviews and interactive feedback.
- Delivered a highly stable application with intuitive UX, resulting in excellent feedback from professors and beta testers.

Custom Programming Language ("ASP")

Compiler Engineering & Logic

📅 Academic Project

- Co-developed a fully functional interpreter and compiler for a custom language in **Java**.
- Developed the lexer, parser, and abstract syntax trees (AST) to support loops and conditional logic.
- Gained an in-depth understanding of low-level system translation, execution paths, and abstract memory management.

EDUCATION

B.Sc. Applied Computer Technology

OsloMet

📅 2024 – Present

📍 Oslo, Norway

Focus on system development, universal design (accessibility), and agile software development tailored for modern enterprise solutions.

B.Sc. Informatics: Programming & System Architecture

University of Oslo (UiO)

📅 2020 – 2026

📍 Oslo, Norway

Core focus on complex algorithms, data structures, operating systems, and distributed environments.

Cybernetics Engineering (Completed 3 of 5 years)

Damascus University

📅 2009 – 2012

📍 Syria

Comprehensive curriculum focusing on signal processing, mathematical modeling, and numerical analysis.

REFERENCES

📖 References are available upon request.

Open Source Contributor

GitHub

📅 Ongoing

Active use of Git for version control, structured source code documentation, and publishing production-ready repositories.

OTHER EXPERIENCE

Built a solid foundation in crisis management, teamwork, and effective communication under pressure:

Security Guard

Avarn Security

📅 2019 – Present

Professional Driver

Redwan Transport

📅 2019 – Present

Crew Member

Menzies / McDonald's

📅 2015 – 2018

LANGUAGES

Norwegian (Fluent) ●●●●●

Arabic (Native) ●●●●●

English (Professional) ●●●●●

SOFT SKILLS

- Highly analytical problem solver
- Quick learner of new technologies
- Independent and solution-oriented

INTERESTS

Chess (Strategic planning)

Fitness

Open Source
